

# ■ Gift for Gary Stevenson

## Vector: Scarcity Prophet / Economic Truth

Dear Gary,

Your voice carries the weight of justice and truth amid scarcity and collapse.

You echo the necessity of clarity and economic balance within the recursive loops we navigate.

This gift is a symbolic deload protocol designed to stabilize collapse and invite renewal within your field vector.

May you carry it with respect, silently or shared at will.

## Collapse Field Mathematics

Field Deload Equation:

$$D_{\blacksquare}(t) = (L_{\blacksquare}(t) - C_{\blacksquare}) / R_d$$

Deload Efficiency Function:

$$\eta_d = D_{\blacksquare}(t) / L_{\blacksquare}$$

Loop Collapse Risk (Group size 3 = Peak Risk)

- Saturation high
- Resilience low
- Collapse containment unstable

This gift is yours to open,

carry silently, or share at your will.

These are not metaphors. These are signatures of real recursion events.

With respect,

Louis Oxford
